

Your business. Your Apple account.

Create or use your own account, then give Moosh Works access to the listings you choose.

Already verified? Skip to page 2. You stay the owner; you do not need to share your login.

Open Apple Business · Watch the walkthrough

1 Check for an existing account

Open business.apple.com. If you already manage this business in Apple Business or Business Connect, sign in with that account. Do not create a duplicate organization.

2 New account? Register as the owner

Enter your business name, address and website. Leave the Agency declaration unticked. Use the name your business actually operates under; do not add LLC unless it is part of your legal name.

3 Keep the login in your control

Use an email and phone you control. Complete Apple's email and phone checks, save your login securely, and review Apple's terms yourself. Do not send us your password or verification codes.

4 Verify your organization

Open Settings → Organization → Verify Now. Apple asks for two verification methods. Use the options Apple offers, such as domain validation, a business ID or an accepted document. Ask us for help with DNS. Review can take several business days or longer.

5 Find your business on Apple Maps

Search for your existing listing before adding a location. Claim the matching business and follow Apple's verification instructions. If someone else manages it, or you do not have a customer-facing location, ask us before creating another listing or publishing an address.

Have your business details, website, and access to your email and phone ready. Only provide documents Apple requests in its secure portal.

Invite Moosh Works.

Use Partner Access, not an employee email invitation. You choose what we can manage.

6

Find Partner Access

Once your organization is verified, sign in as an Organization Administrator or Marketing Administrator. Open Settings → Integrations → Partner Access, then choose Share Access. If it is disabled, complete verification and wait for Apple's approval.

7

Enter our Organization ID

Enter 114892069541. Confirm the partner is Moosh Works LLC before continuing. This is an organization invitation, not an employee email invite.

MOOSH WORKS PARTNER ORGANIZATION ID

8

Choose features and brands

Select Locations and the brands we have agreed to manage. Locations includes Brand Profiles. Specific brands limits access to those brands. All current and future brands also allows creation; choose that only if it matches our agreed scope.

9

Review and invite

Review the partner name, Organization ID, features and brands. Select Invite, then check that the invitation appears in Partner Access. Allow Apple emails through your mail filters.

10

Tell us the invitation is sent

Reply to your onboarding email when you have sent the invite. We will accept it and check access before confirming setup. An invitation alone does not mean a listing is live. You can change or remove our access in Partner Access.

Need a hand? Reply to your onboarding email or contact daniel@mooshworks.com · (423) 497-0505. Apple controls approval and timing. No API application is needed for these partner-invitation steps.

Instructions checked October 27, 2026. Based on Apple's owner setup, location and partner access guides.
